

Alcoguard 1340

Alcoguard 1340 is a unique composition of polycarboxylate and crease resistance agent which imparts a protective, virtually invisible film.

Specifications

pH	5.5 - 6.5
Solid content	29 - 31 %
Viscosity	(RVT #6/20 rpm, 25 Celcius) 5000 - 7000 cps

Notes:

Typical Data are based on our own measurements or derived from the literature. They do not constitute part of the delivery specification.

Safety and handling

All components of ALCOGUARD 1340 are TSCA and EINECS compliant.

Additional information

When applied to materials such as cotton, polycotton and polyester crease resistance and soil guard properties are obtained without unwanted build-up or flaking on darker fabrics. Alcoguard 1340 is completely water soluble therefore is easily removed during the wash cycle providing a secondary benefit of anti-redeposition on hydrophilic soils. Alcoguard 1340 is supplied in a concentrated liquid form allowing you to optimize the level of dilution required for your application. Recommended use level is 1% -5% solids. The degree of stiffness is dictated by the solids level of the solution applied and the number of applications.
