

# Alcosperse 729D

Proprietary sulfonated copolymer

Alcosperse 729D is a hydrophobically modified Acrylic Copolymer. Alcosperse 729D provides multifunctional performance characteristics such as dispersant for both organic and inorganic pigment, hydrotropic effects, increased cloud point of nonionic surfactants, outstanding hydrolytic stability and surfactant compatibility.

## Specifications

|                         |                  |
|-------------------------|------------------|
| Appearance              | Off-white powder |
| pH, 1% aqueous solution | 7.0 - 8.5        |
| Solid content           | ≥ 95 %           |

The Nouryon logo is displayed in a bold, orange, sans-serif font. The letter 'N' is stylized with a vertical bar on its left side. The background of the page features a large, thin, grey curved line that starts from the left side, arches over the top right, and then descends towards the bottom right.
