

Alcosperse 787

Acrylic copolymer

Alcosperse 787 is a novel hydrophobically modified acrylic copolymer dispersing agent developed to help formulators create innovative waterborne paints and coatings with excellent performance characteristics over competitive dispersants such as water mark resistance, alkaline and salt resistance, and other related hydrotropic effects.

Specifications

pH	7-8 (@25°C)
Solid content	29-31 %

Characteristics

Appearance	Clear to amber liquid at 25°C
Solubility in water	soluble

Notes:

Typical Data are based on our own measurements or derived from the literature. They do not constitute part of the delivery specification.

Applications

Water-based architectural paint (interior and exterior). Water-based industrial paint formulation, acrylic based wood coating, metal coating and floor care, etc. It offers great watermark resistant performance, excellent pigment dispersion, better color acceptance than other dispersants in the marketplace, good hydrophobic properties, and good storage stability. It is an excellent choice for acrylic emulsion-based paint formulations.

Storage

For complete information on how to handle and store Alcosperse 787 dispersing agent, please contact a product Safety Data Sheet by contacting Nouryon Customer Service in your region.
