

BERMOCOLL KCB 470 X

BERMOCOLL KCB 470 X is strong modified nonionic, water soluble cellulose ether, intended as a water retaining and consistency improving additive to gypsum based mortars.

Specifications

Appearance	Whitish powder
Particle size	98 % \leq 300 μ m
Water content	\leq 4 %

Characteristics

Surface activity	Weak
Viscosity at 20 °C (Brookfield LV), 1% solution	2500-3500 mPa.s

Notes:

BERMOCOLL KCB 470 X is a modified, high viscosity grade of ethyl hydroxyethyl cellulose.

Applications

BERMOCOLL KCB 470 X is used as an admixture in gypsum-based mortars. BERMOCOLL KCB 470 X effectively counteracts the sagging tendency of the mortar and gives good workability. BERMOCOLL KCB 470 X ensures good water retention and gives a mortar with suitable working time. Mortars containing BERMOCOLL KCB 470 X have excellent adhesion to the background. Normal dosage is 0.40.7% in mortars calculated on dry mortar weight. BERMOCOLL KCB 470 X should be admixed to the mortar in dry form.

Storage

In unopened bags, BERMOCOLL KCB 470 X can be stored for several years. In opened bags, the moisture content of BERMOCOLL KCB 470 X will be influenced by the air humidity. At the temperatures above 250° C (480° F), charring of BERMOCOLL KCB 470 X will occur.

Packaging and transport

Like many industrial processed powdery materials, cellulose ether dusts are combustible and can cause dust explosions. Dust formation must be avoided or kept to a minimum. Care should be taken to prevent ignition from heat, spark, open flames or hot surface. BERMOCOLL KCB 470 X is packed in a polyethylene bag. Net weight 20 kg. The empty bags can be recycled and burned. In unopened bags, BERMOCOLL KCB 470 X can be stored for several years. In opened bags, the moisture content of BERMOCOLL KCB 470 X will be influenced by the air humidity. At the temperatures above 250° C (480° F), charring of BERMOCOLL KCB 470 X will occur. At high temperatures and in contact with an open flame, BERMOCOLL KCB 470X will burn slowly with the characteristics of cellulose.

Safety and handling

At high temperatures and in contact with an open flame, BERMOCOLL KCB 470X will burn slowly with the characteristics of cellulose.
