

# Levasil FX200 C

## Colloidal silica

Levasil FX200 C is a cationic acidic, aqueous dispersion of colloidal silica that is approximately 31% solids by weight. The silica dispersion is chloride stabilized and the amorphous silica particles carry a positive surface charge. The silica particles are discrete, have a smooth, spherical shape, and are present in a semi-wide particle size distribution. The physical appearance of the dispersion is an opalescent liquid, slightly more viscous than water with the recognizable smell of acetic acid. Levasil FX200 C is produced for world-wide distribution.

CAS number  
7631-86-9

### Characteristics

Silica	25 wt%
Density	1.2 g/cm <sup>3</sup>
Specific surface area	160 m <sup>2</sup> /g
Surface area, via BET	200 m <sup>2</sup> /g
pH	3.8
Viscosity	≤ 5 cP

### Applications

Levasil FX200 C is a highly reactive silica source for manufacturing of silica containing alumina fibers.

### Storage

Levasil FX200 C should be transported and stored at a temperature of 5-50°C (40-120°F). If the silica dispersion is allowed to freeze, the silica will irreversibly precipitate. For bulk storage, the tank should be sealed and constructed of plastic, fiberglass reinforced plastic, or stainless steel. For packaged goods, any translucent packages should be stored out of direct sunlight or bright light. Under recommended conditions, Levasil FX200 C has a shelf life of at least twelve months after production.

### Packaging and transport

Levasil FX200 C has European availability in bulk and world-wide availability for packaged quantities.

### Safety and handling

Before handling this material, review the corresponding Material Safety Data Sheet. Colloidal silica products are aqueous dispersions of amorphous silica. Colloidal silica is not classified as harmful, but as mildly irritating. Because the products can have a drying effect on the skin, protective gloves should always be used. In case of skin contact, wash the area of contact with plenty of water. The use of safety glasses is always recommended. In case of eye contact, rinse with large amounts of water and seek professional medical advice.

All information concerning this product and/or suggestions for handling and use contained herein are offered in good faith and are believed to be reliable. Nouryon, however, makes no warranty as to accuracy and/or sufficiency of such information and/or suggestions, as to the product's merchantability or fitness for any particular purpose, or that any suggested use will not infringe any patent. Nouryon does not accept any liability whatsoever arising out of the use of or reliance on this information, or out of the use or the performance of the product.
