

Redicote® E-5

Emulsifier for cationic quick-set bitumen emulsions for quick-traffic slurry and micro surfacing

Benefits and features

• Small particle size:

Emulsions produced using Redicote E-5 have exceptionally small particle size suitable for prime coats and dust control

• Easy handling:

The low viscosity, low pour point and water solubility of Redicote E-5 makes it easy to use

Co-emulsifier:

Redicote E-5 is a versatile co-emulsifier used to improve the quality and mixing behavior of cationic medium-setting emulsions

• No need for acid:

No acid is required for soap preparation. The neutral pH of the emulsion is preferred in applications like tack coats for concrete

• No APEs:

The product does not contain alkylphenolethoxylates

Storage and handling

Redicote E-5 contains 2-propanol, keep away from sources of ignition. Redicote E-5 contains water and chloride ion and 316 and 317L stainless steels or glass or polymer lined tanks are recommended. Bulk storage need not be heated. Redicote E-5 contains quaternary amines and may cause severe irritation or burns to skin and eyes. Protective goggles and gloves must be worn when handling this product.
